

About us

We are manufacturers of a variety of wooden doors, plywood, blockboards and packaging cases. Our journey started in 1997 with a simple goal to provide great quality wooden products at the right price for all consumers. Almost 24 years later, we have supplied our products to over 40 cities across India, satisfying thousands of customers along the way.

Our Journey

We started as a simple wood trading unit back in the late '90s. Eventually we got into the manufacturing of commercial flush doors and then expanded our product line to include multiple different sister products like plywood, laminated products, blockboards, chemical pattern doors and wooden packaging. Our mission is to become an all wooden solutions company to serve the community in a sustainable way - one customer at a time.

Our Core Values

Quality

Being in the industry for over 20 years, we're used to working with all types of customers - local or global, large or small. Exceptional quality is the foundation of our company, and is the driving force behind all decisions; whether it's which materials to purchase or the best way to serve our customers. Our commitment to quality guarantees our success and your satisfaction.

Customer Experience

We believe in full transparency within our team and with our customers. For that reason, our production process includes many rigorous practices and procedures to ensure the end result is the best it can possibly be. We are only satisfied when our customers are too.

Accountability

We believe accountability should be an integral part of our professional lives. We are accountable to ourselves as well as to our customers.

Respect

For us, simply selling products has never been enough. Treating our employees, colleagues and customers with respect and dignity at every stage is a non negotiable part of who we are.

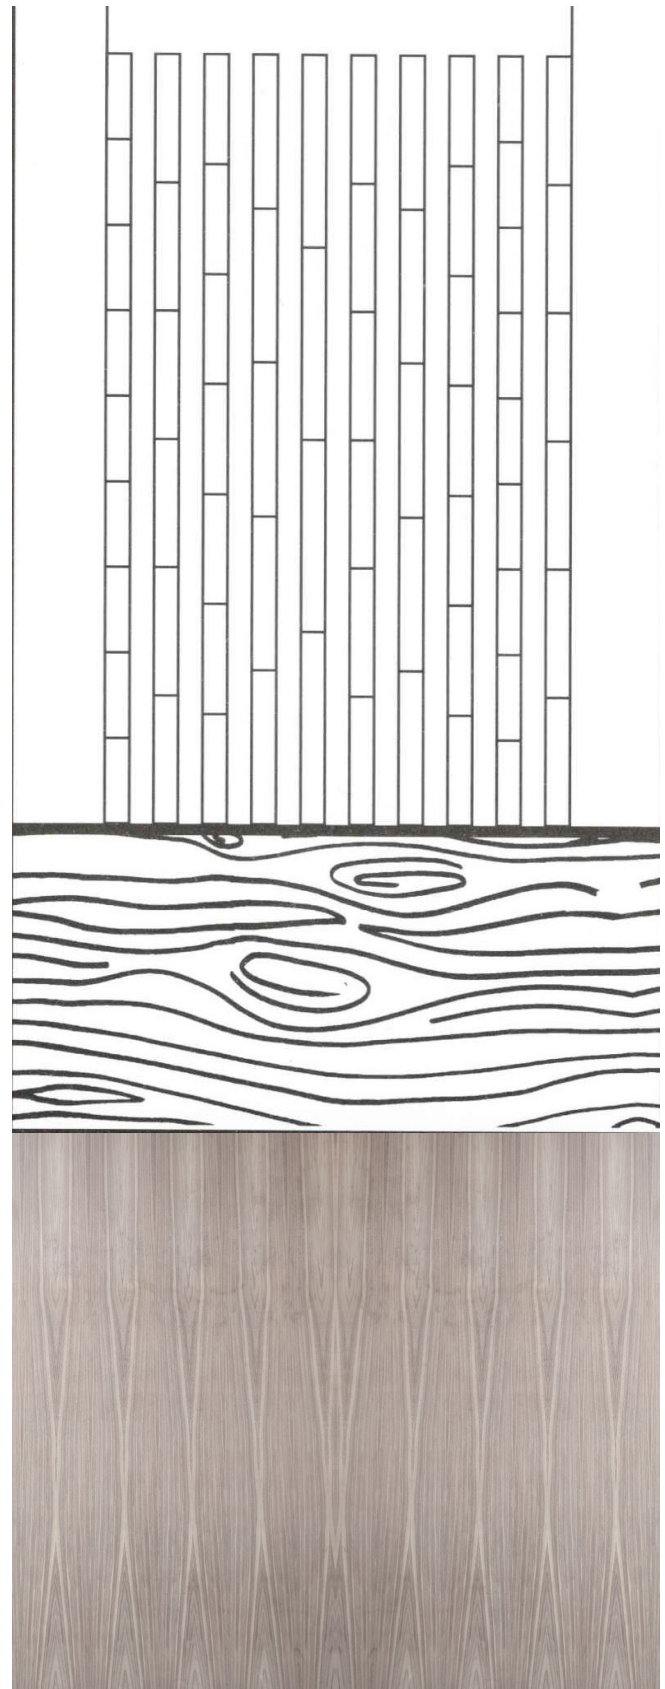

Our Manufacturing

The accompanying image shows the layers of a Shubham flush door. The top part shows a tightly wood locked pattern of wood filler engulfed by solid wood frame on the sides.

The middle part displays the core veneer layer added on top of this base wooden assembly while the third layer displays the finish – face veneer, teak veneer or laminate. In the case of laminated and natural teak doors, the laminate/veneer sheet acts as the fourth layer added over the face improving water resistance and door quality.

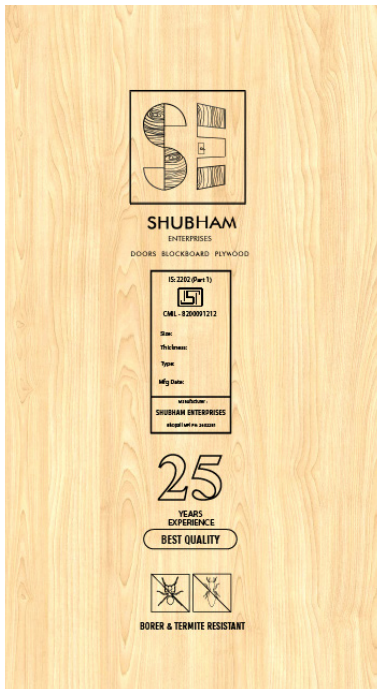

The layers are inter-attached with industry standard resin optimized by our in-house production department. This door is then hot pressed before going to the finishing department which then finalizes the Shubham door for your Shubh homes.

The standard thicknesses are 25 mm, 30 mm, 32 mm, 35 mm and 40 mm. The size of the door varies as per as the customer's requirement. We manufacture all sizes.

Our Products

Flush door

IS:2202 (Part-1)

Our flush doors have been our niche product since over 20 years. The wood locking in the building of the base of this door provides the stability and strength required to sustain any slamming and prevent any subsequent damage. Our chemical treatment ensures water, borer and termite resistance. We are IS:2202 (Part 1) certified.

We provide all the standard dimension sizes and since we are a manufacturer, we can modify any of the standard sizes to accommodate your requirement.

Standard thickness: 25 mm, 30 mm, 32 mm, 35 mm, 40 mm.

Our quality has stood the test of time, as displayed by our 500+ satisfied customers. Give us a chance to add you to that growing number.

Plywood

Size: 6, 9, 12, 18 (in mm)

Blockboard

Standard 19 mm (Pinewood),
Other sizes available on demand

Note: The final product may differ from the product images displayed in this brochure.

Decorative doors

laminated, natural teak, recon teak, digital/chemical*

We manufacture a variety of decorative doors in 3 different finishes: teak veneer, laminated sheet and digital sheet based on the consumer's need and demand. In laminated and digital sheets, there is a huge variety of available designs and patterns, some of which are showcased here while every single teak veneer sheet is unique in its wood grain pattern. If you would like to see more designs, please contact our representative. Prices and availability of each design varies from time to time.
